About Beau Floor

Beau Floor offers the highest quality flooring products with the most competitive pricing and distinct aesthetics – classic flooring, redesigned in long-lasting and modern styles. Our range includes our top quality ALFA & BOSTON HYBRID and CLASSIC LAMINATE flooring, with outstanding features and built to last. Beau Floor has been supplying quality flooring materials and accessories to many major retailers in Victoria and nationwide, All the products have been tested by AWTA Australia. All our products are covered by Lifetime Structural Warranty, 10 Years Commercial Surface Warranty and 25 Years Residential Surface Warranty.

SPC Hybrid & Laminate Flooring Introduction:

It is very important to choose the right flooring for your dream house or office, home etc. You need to do a lot of research and visit many floor store to check the floor material, colors, cost, durability etc. If you have kids and pets, you also need to think about whether the floor is eco friendly.

We are going to help you to know how to choose the most suitable floor for your home .

Laminate floor is one type wooden floor, it is more economical and much more durable than timber flooring in general, not waterproof, but water-resistant on the surface and click-system , can be installed in the kitchen. Laminate floor feels close to nature and soft, suitable for living rooms and bedrooms.

While SPC Rigid core flooring is totally waterproof, can be used in kitchen and bathroom. Besides, if you have kids and pets, SPC floor is also a wise choice, as SPC floor has no heavy metals, phthalate, methanol, and other harmful substances, which is good for kids.

According to your budget, select the most suitable floor for yourself. Our Laminate floor and SPC floor are extremely competitive priced in the market for its quality according to our retailer network.

Compare to engineering timber flooring?

Hardwood floors, engineered floors are much higher priced with real timber finish. They can provide genuine wooden feeling But the hardwood floor and engineered floor need to be polished with wax after a few years, and can't withstand the wet conditions that well.

ALFA HYBRID COLLECTION

ALFA HYBRID collection is the latest innovation in the flooring market. With dimensions of 1800 mm length, 228mm width and 7mm thickness – Our collection is 100% waterproof, scratch, fire and stain-resistant. Also known as SPC (Stone Plastic Composite) vinyl, the stone plastic composite core makes this collection essentially unbreakable. Finished with a vinyl top layer that allows us to replicate any style and texture. Additionally, the thickness and durability can hide an imperfect subfloor, making it efficient and cost-saving. The entire production cycle is environmentally friendly, constructed without the use of glue, eliminating the risk of formaldehyde completely. This is the trademark of the ALFA HYBRID. Our ALFA HYBRID collection carries a range of radiant and sophisticated colours to suit your style decor. With its length and thickness, this collection is perfect for large spaces and for those looking for flooring that will withstand consistent amounts of high traffic whether in the home, business or office.

CLASSIC LAMINATE COLLECTION

Our CLASSIC LAMINATE collection is our most functional flooring solution. Made with over 20 years of flooring expertise, its dimensions of 1850mm length, 1970mm width and 12mm contains the highest flooring grade, AC5, and a heavy-duty HDF (high-density) core – built with outstanding durability and stylish aesthetics. This range carries innovative features such as water, fire and slipping resistance and sound and heat insulation. With our collection inspired by nature, it features the beauty of natural wood while being capable of withstanding major commercial traffic.

Our CLASSIC LAMINATE collection carries eight beautiful colours, with three in our stunning Herringbone pattern. Our wide range of colours and textures brings Nature to you, with the deepest detail and traces. Its thick dimensions of 12mm makes our collection the ideal flooring for your home, business or office space.

QUALITY CONTROL

Product quality is everything for us. We use the most advanced equipment in the market to manufacture our products. At BEAU Floor, we have formed a professional quality control department following an extremely high quality control standard after decades of development.

Every piece of BEAU SPC floor is rigorously tested before being delivered to clients. Firstly, with the SPC raw materials, we promise to each customer not to use any recycled plastic and harmful substances. Secondly, for the dimensional stability, we test our samples in high-temperature baking at 80℃ for 24 hours to check dimensional stability.

Finally, with the SPC surface, we use double UV coating to make our SPC floor have excellent stain-resistance, scratch-resistance, smoke-resistance and slip-resistance. BEAU Floor strictly controls every step of the production process to provide you with the highest quality flooring in the market.
